### **List of ISVs (Independent Software Vendors) and Data Vendors**

Dear EPEX SPOT data user,

We are pleased to inform you that you can now consult on our website the list of all certified Independent Software Vendors and Data Vendors which provide software interfaced with M7 (ex ComXerv) or ETS via our APIs:

**List of ISVs :** [http://www.epexspot.com/en/membership/list\\_isv](http://www.epexspot.com/en/membership/list_isv)

**List of Real Time Data Vendors:** [http://www.epexspot.com/en/market-data/list\\_vendors](http://www.epexspot.com/en/market-data/list_vendors)

#### List of ISVs:

The list hereafter contains all firms which have developed software real-time interfaced with the EPEX SPOT trading systems through APIs. Their software has been certified (or will be soon) by EPEX SPOT following a series of operating tests aiming at validating their conformance with products/markets specifications.

You also find in this list type of access to the trading systems granted to these firms, i.e. read only or read & write mode. A read access mode enables to retrieve on a real-time basis all information from the EPEX SPOT trading systems whereas a read & write access enables in addition to the reception of all information coming from the trading systems to send information such as orders to the EPEX SPOT trading systems.

The EPEX SPOT trading systems which can be accessed via APIs are:

- **ETS** for the day-ahead auction
- **M7 (ex ComXerv)** for the intraday continuous market.

## ISVs already certified:
