

PRESS RELEASE

**EPEX SPOT continuous Intraday markets
to be included on Trading Technologies'
TT Screen**

Paris, 15 March 2016 – The European Power Exchange EPEX SPOT today announces the inclusion of its continuous Intraday markets on the direct screen (TT Screen) of Trading Technologies International, Inc. later this year.

Trading Technologies has started developing the solution. It will provide traders with a connection between the global TT Screen and EPEX SPOT Intraday trading system M7. Market participants will hence be able to enter trades for the continuous Intraday markets via the TT Screen.

The TT Screen is already used to access the EEX markets for power derivatives, emissions spot and derivatives as well as coal and guarantees of origin. The EEX TT Screen was implemented in February 2015, and it enables market participants to enter their trades. The inclusion of EPEX SPOT, also part of EEX Group, will allow traders to access all spot and derivatives products and prices on one screen, allowing them to easily trade the entire curve and across commodities.

The new connectivity of TT Screen offers an additional access to EPEX SPOT continuous Intraday markets and offers diversity to trading screens that traders use on a daily basis.

- ENDS

The European Power Exchange EPEX SPOT SE and its affiliates operate organised short-term electricity markets for Germany, France, United Kingdom, the Netherlands, Belgium, Austria, Switzerland and Luxembourg; markets representing 50% of European electricity consumption. Striving for the well-functioning European single market for electricity, EPEX SPOT shares its expertise with partners across the continent and beyond. EPEX SPOT is a European company (Societas Europaea) in corporate structure and staff, based in Paris with offices or affiliates in Amsterdam, Bern, Brussels, Leipzig, London and Vienna. More than 280 companies have traded 566 TWh of electricity on EPEX SPOT and its affiliates in 2015. EPEX SPOT is member of EEX Group, part of Deutsche Börse. European electricity transmission system operators hold 49% of EPEX SPOT through HGRT. For more information, please visit www.epexspot.com.
