

## POWER MARKET DATA/INFORMATION PRODUCT PACKAGES

In May 2008, EEX and Powernext announced the cooperation of their electricity markets, resulting in the creation of two new companies:

- EPEX Spot SE: based in Paris, the joint venture EPEX Spot facilitates power spot market trading 365 days a year on the French, German/Austrian and Swiss hubs;
- EEX Power Derivatives: based in Leipzig, the company facilitates German and French power derivatives trading for futures and options.

One of the consequences of the cooperation is the harmonization of the power market data/information packages between EPEX Spot and EEX Power Derivatives. Starting on 1<sup>st</sup> January 2010, the customers will be able to subscribe to the same power market data packages either on EPEX Spot's or on EEX's websites. EEX's historical data will be increased by EPEX Spot data for the French market area; on the other hand, EPEX Spot's historical data will be increased by the power data for the German/Austrian and Swiss market areas.

Please find below a summary of the Market Data / Information Product packages available on EPEX Spot's website:

Package	Price	Technical Access	Internal Use	Publication Right (internal and/or free publication only)	Reselling Right
Info-User Real Time Power	4000 €/year	API, FTP and website	X		
Info-User End-of-Day Power	400 €/year	FTP and website	X
